

Invitation

Anaesthetic Emergencies nr118

A 3 day course consisting mainly of full-scale simulations, for specialist anaesthetists, trainee anaesthetists and nurse anaesthetists

From: 7.45 am 31 October

Until: 4 pm 2 November 2017

**Karolinska University Hospital,
Huddinge, Stockholm, Sweden**

Apply as an individual or as a team of specialist ± trainee ± nurse anaesthetist.

Course format

1. **Pre-course reading.** An in-depth course manual covering essential conditions including MH, circulatory collapse during anaesthesia and difficult airway will be sent to you 8 weeks before the course.

2. **Online pretest.** You will be required to answer a pretest before coming to the course.

3. **Preparatory morning**, including systematic approaches to anaesthetic problems, crisis resource management and theory concerning simulation

and debriefing to maximize learning.

4. **Full scale simulations of serious anaesthetic situations followed by debriefing.** 8 cases, 90 minutes per case including debriefing. Simulations are run by teams of experienced facilitators.

5. 3 additional **short lectures/ workshops** on airway management, circulatory collapse and CRM.

6. **Airway workshop** (90 minutes) covering both surgical airway (wet-lab) and video/fiberlaryngoscopy.

7. **Posttest.** Similar format to the pretest.

Feedback from previous courses

I would recommend this course to a colleague mean 5,0 / 5,0.

“The best course I have ever attended”

Background

This course has been held 15 times at six centres throughout Sweden since 2013 and is now standardized such that we can offer it in English. In the near future we hope to enable colleagues in other countries to use our continually improving material so that they may run the course themselves. The course has been subsidized by the Swedish Association of Junior Anaesthetists since there was a perceived lack of availability of training in simulated environments. The full-scale simulations are most beneficial when natural teams of specialists, trainees and nurses participate. A condition of holding the course in the future will be that the instructors must have attended the course.

Eligibility

-Specialist or trainee anaesthetist (12 places per course) or nurse anaesthetist (4 places per course). Anaesthetists should be used to working in a team with nurse anaesthetists. At least 3 years' experience is recommended.

-English proficiency such that working in English and debriefing (ie explaining complicated interactions) will not be hindered.

Fee and application

13500SEK (not including VAT, ca 1400EUR) includes all refreshments and lunch during the course, and dinner on the 31 October. European participants who are not members of ESA or their national society will be charged an additional fee. Places will be allocated at the end of July 2017, thereafter on a first come, first served basis. **Electronic application on baskurs.org.**

Enquiries: info@baskurs.org or tel Owain Thomas, Lund +46-46-176686.

**SFAI Swedish Association of
Anaesthesia and Intensive Care**
